

# How To Test Data Channel Using RWC2010B

SLS / EPG / SPI / DLS

June 2022

# 1. SLS - Slideshow

The RWC2010B provides a function to test SLS using the PAD or Packet Data channel. You can download your own picture files into the RWC2010B. Picture files for SLS testing must be in PNG format and the file size must be small enough. Some PNG files can be downloaded from RedwoodComm's file server using a PC program as described in section 1.3.

## 1.1 SLS Test Using Data Channel

The SLS packet data channel can be configured as a secondary component of the existing DAB service as below.

### SERVICE\_00

### 1.3 Example of PNG file download using a PC program

To get example PNG files, run the RWC2010\_utility.exe program and select the FILE MANAGER. Then, click the update list icon to get the file list from RedwoodComm's file server in the lower-left corner. Select the files you want to download and click the download icon (arrow button between RWC FILE SERVER and PC).

## 2. EPG - Electronic Program Guide

The RWC2010B provides the function to test EPG using the PAD or Packet Data channel. The start time and duration of the program can be edited in the RWC2010B GUI. You can edit up to 10 program schedules.

### 2.1 EPG Test Using Data Channel

The EPG packet data channel can be configured as a secondary component of the existing DAB service as below.

#### SERVICE\_00

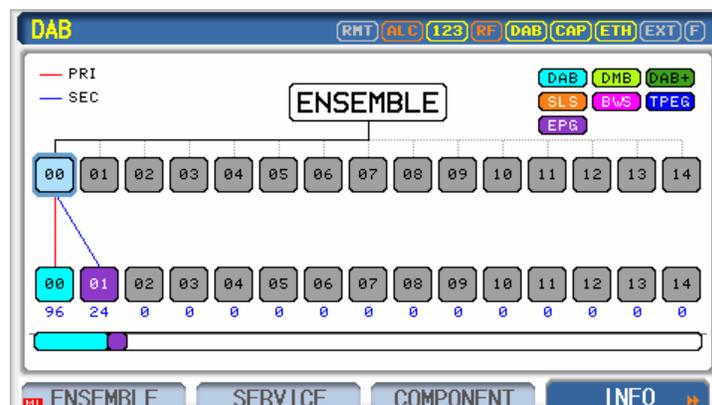

PRIMARY	COMPONENT_00
SECONDARY_1	COMPONENT_01

#### COMPONENT\_00

MODE	DAB
CONTENTS	any mp2 file

### 3. SPI - Service and Programme Information

The RWC2010B provides the function to test SPI using the PAD or Packet Data channel. The program logo files are fixed as the RedwoodComm logo files. So users do not need to download logo files. Some example PNG files can be downloaded from RedwoodComm’s file server using the PC

#### 3.1 SPI Test Using Data Channel

The SPI packet data channel can be configured as a secondary component of the existing DAB service as below.

**SERVICE\_00**

## 4.2 DLS Editing Using PC program

RedwoodComm provides an easy way to edit multiple languages using a PC program as below.
