

Equipment : RWC2010M, Digital Radio Tester

## Revision History

Version	Date	Description
Version 1.010	10 Aug.2023	<ol style="list-style-type: none"><li>1. Fixed an issue where the signal was disconnected during DRM+ transmission.</li><li>2. Added quasi-peak detector function to Audio Analyzer.</li><li>3. Added Path_loss Parameter.</li><li>4. Added parameter for remote command delimiter option to select delimiter among LF, LR, LF+LR.</li><li>5. Fix the bug in "CONF:SETUP:TESTER_MODE" remote command. It couldn't change between AM and FM modes.</li><li>6. In DRM mode, the OFDM window function was incorrectly applied, creating a spurious signal in the spectrum. This bug is fixed.</li><li>7. The EON_AF parameter is set to an incorrect value in FM RDS. It is fixed.</li><li>8. There was a problem that the magnitude of the OFDM symbol changes during DRM+ transmission, so it was corrected.</li></ol>
